

6516209406.txt

We the consumers are tired of the yammering on regular TV and radio broadcast. It is our right to pay for our XM radio and listen to what we want. While traveling we receive the news and weather at our finger tips without having to scan to see what radio station we get in different locals and sometimes can't find what we are looking for.

Please reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that we demand and deserve.

Thank You
